Scott Sun

MSc IB @UCD Smurfit || Transition to Tech | Ignite Tech-centric Business Solutions | Techno Optimist
Dublin, County Dublin, Ireland

Summary

My Mission: HARNESS the power of AI or technology in general, ELEVATE business logic design, and BUILD toward a societal transformation.

My Core Strength: Professional and up-to-date knowledge of technology in business settings, and the ability to deliver tech-centric business solutions to stakeholders.

My Proposition: The exponential growth of computing power, digital data & artifacts, and the progress in neural-network-based ML/AI, together signal a business intelligence revolution in both scale and depth. I'd like to be the agent of that change.

Business:
Previously: I've successfully managed multiple medium to large projects, enhancing financial accuracy and streamlining processes. My role as a liaison between project teams significantly reduced operational friction and overhead. I've demonstrated a keen eye for improvement, leading initiatives that drastically reduced income reporting processing time. Through regular data analysis and collaboration with customer research teams, I ensured financial compliance and contributed to notable increases in customer satisfaction. My ability to generate actionable insights from financial reports has consistently supported informed decision-making and operational efficiency.

Now:
-Graduating from my business Masters, having studied strategies, management, and marketing to gain deeper understanding of optimal industry principles;
-A proud member of Smurfit Toastmasters Club, continuously honing my English speaking and presentation skills;

-Successfully delivered the PMIA business consultancy solution with my team to an SME in Africa;
-Successfully completed the UCD Global Leadership Program (GLP), developed leadership skill sets;
-Interested in and learning Tech industry landscape, strategy, & VC.

Tech:
-Adept in Python, familiar with Deep Learning & Data Science tools/frameworks;
-Understand software stack orchestration, general DevOps, MLOps & computer science;
-Knowledge of Cloud Services, especially those involving computing & data/ML pipelines;
-Coded and trained my own miniature decoder-only GPT-style LLM base model;
- 【Harvard University】: CS50 graduation;
- 【Microsoft Certified】: Azure Data Scientist Associate (DP-100);
- 【Microsoft Certified】: Azure AI Engineer Associate (AI-102);
- 【Microsoft Certified】: Azure Fundamentals (AZ-900);
- 【DeepLearning.AI】GenerativeAI with LLMs deep-dive course;
-Eyes & hands always on latest research progress & industry practices (, arXiv, Hugging Face, GitHub, All In & Acquired Podcast).
